

OUR INTERACTION DATA

In this section, you will find research results published by Hybrigenics.

How do I get interaction data file ?

To get these data, you will have to fill a registration form first. A login / password will be then sent back to you. This login will enable you to download (for free) interaction data from all research programs as XML files.

What is the interaction data file format ?

Interaction file format is XML PSI-MI V1. You can download the PIMWalker application to display the Interaction Map. Use PIMWalker V1.0.5 to display PSI-MI V1 file.

What is the PIMRider application for ?

With the login you used to get interaction data, you will also be able to access the PIMRider application and navigate through the same interaction data using graphical tools dedicated to protein-protein interaction network exploration and Y2H technology.
